4. First-aid measures			
Inhalation	Move to fresh air. Call a physician if symptoms de	evelop or persist.	
Skin contact	Wash off with soap and water. Get medical attent	tion if irritation develops	and persists.
Eye contact	Rinse with water. Get medical attention if irritation	n develops and persists.	
ngestion	Rinse mouth. Get medical attention if symptoms of	occur.	
Most important symptoms/effects, acute and delayed	Prolonged exposure may cause chronic effects.

5. Fire-fighting measures			
Suitable extinguishing media	Water fog. Foam. Dry chemical powder. Carbon of	dioxide (CO2).	
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this w	ill spread the fire.	
Specific hazards arising from the chemical	During fire, gases hazardous to health may be for	rmed.	
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full prote	ctive clothing must be we	orn in case of fire.
Fire-fighting equipment/instructions	Use water spray to cool unopened containers.		
Specific methods	Use standard firefighting procedures and conside	r the hazards of other in	volved materials.

General fire hazards

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.
Methods and materials for containment and cleaning up	Stop the flow of material, if this is without risk. Dike far ahead of spill for later disposal. Following product recovery, flush area with water. Prevent entry into waterways, sewer, basements or confined areas. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid release to the environment. Inform appropriate managerial or supervisory personnel of all environmental releases. Contact local authorities in case of spillage to drain/aquatic environment. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.
7. Handling and storage	
Precautions for safe handling	Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective

No unusual fire or explosion hazards noted.

Conditions for safe storage,Store in original tightly closed container. Store away from incompatible materials (see Section 10

including any incompatibilities of the SDS).

Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.
